

#JUSTTHROWIT

# STIFFLINE

Our engineers designed this two-component throwline with a highly resistant Dyneema cover that slips across rough bark and a super-rigid nylon core to avoid knots and time wasted untangling!

## THROWLINE

## DESCRIPTION

This specific line combined with a throwbag permits reaching even the most difficult forks in trees. This line is rigid, resistant to wear and doesn't knot.

Dyneema has the best gliding coefficient for textile fibres, and it can be particularly useful for adjusting the rope position and scraping of bark.

It is smoother and lighter, to reach the highest areas with the littlest effort. Its nylon core gives it a certain stiffness, so it will not coil as much as other lines, and it helps throwing further.

Very long lifespan.

It's a very solid material, so we recommend undoing the throwbags after each unsuccessful throw since the line is hard to break without the breaking fuse point. The 1.8 mm (0.07 in) version is easier to handle, more adapted for first-timers.

Line colour: Yellow or blue

Available in: 40 m, 50 m, 60 m and 80 m (131.2 ft, 164 ft, 196.8 ft and 262.5 ft)

## TECHNICAL INFORMATION

Ø	COLOUR	LENGTH (M/FT)	COVER	CORE	MBS
1,6 mm	Yellow or green	40, 50, 60 and 80 m 131.2, 164, 196.8 and 262.5 ft	Hollow braid in Dyneema	Nylon thread	220 daN
1,8 mm	Yellow or blue	40, 50, 60 and 80 m 131.2, 164, 196.8 and 262.5 ft	Hollow braid in Dyneema	Nylon thread	250 daN
