

# APW6000 BATTERY COMPATIBILITY

Choose the right STIHL AP or ALLPRO battery for the performance you need.

POWERED BY **STIHL** **APL** SYSTEM

**STIHL AP & ALLPRO COMPATIBLE** | 3-SPEED SELECTOR

| OPTIMAL PERFORMANCE                                                                                                                                                             | COMPATIBLE                                                                                                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
|           |                                                       |
| <p><b>ALL THREE SPEED SETTINGS</b></p> <p>Provides access to every speed setting and the best available runtime for demanding applications.</p>                                 | <p><b>ECO MODE ONLY</b></p> <p>These batteries operate the APW6000 in ECO mode only. Expect shorter runtime per charge.</p>                |
| <p><b>RECOMMENDED BATTERIES</b></p> <p>STIHL AP 500 S (337Wh)<br/>STIHL ALLPRO AP 300.0 P (333 Wh)<br/>STIHL ALLPRO AP 300.0 PC (Connected)<br/>(333 Wh)</p>                    | <p><b>COMPATIBLE BATTERIES</b></p> <p>STIHL AP 300 S (281 Wh)<br/>STIHL ALLPRO AP 100.0 P (111Wh)<br/>STIHL ALLPRO AP 200.0 P (222 Wh)</p> |
| <p><b>BEST CHOICE FOR FULL PERFORMANCE</b></p> <p>Use an AP 500 S, ALLPRO AP 300.0 P or ALLPRO AP 300.0 PC battery to access all three speed settings and maximize runtime.</p> |                                                                                                                                            |

*Performance depends on the battery model installed. Battery availability may vary by market.*
