# KLIK N'KA

Our Klik N'Ka spurs are as light as carbon, as solid as aluminium, and very comfortable. Our designers went the extra mile to make adjusting easier for you using a micrometric fastener system.

## CLIMBING SPURS

## DESCRIPTION

They are very light and innovating spurs – the goal was to combine comfort with a precise and easy adjustment. The thick preformed padding allows for a comfortable support of the shins, and the micrometric buckles enable a quick and perfect adjustment.

The comfortable support to the shins is provided by the thick preformed foam. The micrometric buckles help adjusting the spurs quickly and precisely, for a better support during rigging works.

KLIK N'KA: the name comes from the combination of KINKAJOU (an arboreal mammal living in the tropical rainforests of South and Central America that moves about with their claws) and CLIC-CLAC, the sound of the micrometric fastening system, a major innovation of these spurs.

The spurs are delivered in a textile packaging, without the underfoot grips.

The KLIK N'KA grips, gaffs, foam paddings and straps are available as spare parts, so that they can be used many years.

## TECHNICAL INFORMATION

	DIMENSIONS AND ADJUSTMENTS	MATERIAL
Assembled spurs	1. 8 kg (4 lb, pair without grips) Min./max. height: 42-48 cm (1.4-1.6 ft)	
Lock system	Micrometric buckle Quick adjustment Perfect tightening	Moulded glass-fibre reinforced thermoplastic
Shanks		Aluminium
Shells	4 height positions	Epoxy-glass fibre composite and carbon
Comfort padding	Thick, comfortable foam	Thermoformed EVA / polyester
Grips	3.5 oz (pair)	Machined stainless steel
Gaffs	Length: 5 cm (2 in)	Forged stainless steel
Gaff protections		Vinyl
Packaging	52 x 20 x 15 cm (20.5 x 7.9 x 6 in) 2 transport handles	Polyester
