STIHL PKA 30.0 PUMP HEAD AS AN ACCESSORY

ASIM
SYSTEM

CONSTANT
POWER

IPX4

BENEFITS AND SALES ARGUMENTS

Automatic and constant pressure for even application of liquids - Convenient, energy-saving and time-saving work without manual pumping. Liquid agents are effectively applied in constant quantities.

Precise dosing thanks to variable pressure adjustment (1.5 - 2.5 bar) - Pressure can be adapted precisely to the requirements of the respective application. The amount of liquid applied can be optimised, thus saving resources (e.g. pesticides or fertilisers)

Reduced energy consumption due to automatic switch-off - If the tank is empty or the appliance is not used for a longer period of time. Easier and more convenient operation for the customer. Reduces energy consumption and extends battery service life. Increases the service life of the appliance and reduces maintenance costs

Simple and intuitive operation - Infinitely variable pressure adjustment for application-orientated dosing of the spray volume; ON/OFF switch; Battery charge level indicator prevents unexpected interruptions during work

Air compressor pump - No direct liquid contact prevents deposit problems and ensures reliable operation

TECHNICAL DATA

RATED VOLTAGE / BATTERY SYSTEM	[V]	10,8 (AS)
OPERATING PRESSURE	[BAR / PSI]	1,5 - 2,5 / 22 - 36
MAX. PRESSURE	[BAR / PSI]	2,5 / 36
DEVICE WEIGHT WITHOUT BATTERY	[KG / LBS]	0,9 / 1,7
DEVICE DIMENSIONS (LENGTH X WIDTH X HEIGHT)	[MM]	145 x 128 x 259
