

#2BAGSNOTWIST

MATRIOSAC 3

Since no winding is needed for storage, your throwlines will be free of knots—saving you from wasting time when you need to pull out your throwing equipment.

THROW ACCESSORY

DESCRIPTION

The MATRIOSAC set is composed of two round bags, that fit into each other and fold to a compact size. Two sets for throwing can be stored, i.e. 2 throwlines and 4 throwbags. The inner pocket is oriented so that when the bag is carried with the side handle, the gear stays nicely put. It is also equipped with a large pocket under the large bag, for extra gear (cambium saver, throwbags, carabiners etc.).

Folding the bag holds the throwline flat at the bottom. four straps with quick-release buckles hold the set folded together.

Once it is open, the MATRIOSAC is very stable, held on the ground by the bags and accessories held in the bottom pockets that act as ballast. Its round profile means a lesser wind surface area. The bottom is reinforced and waterproof - it is therefore stronger and offers the gear a better protection against ground moisture.

TECHNICAL INFORMATION

Double wall	polyurethane-coated polyester
Weight of the set	1.5 kg (3.3 lb)
Dimensions large bag (with lid)	Diameter 38 cm (15 in), 30 cm high (11.8 in), 900 g (2 lb), black.
Dimensions bottom pocket for extra gear	Diameter 38 cm (15 in), 5 cm high (2 in).
